

Program Evaluation	This lecture is for the person who wants to learn financial accounting system. Especially in this lecture, I will concentrate on the legal point of view. Before we start learning Japanese accounting system for big companies, we need to study the accounting concept about Japanese Corporation Law & Corporation Tax Law. After we finished those, we can begin to learn the evaluation of accounting system. In Addition to that, it is important for us to understand managers & shareholders behaviors in stock market. Then we had better consider Agency theory. The theory contains managers & shareholders behaviors. Surely Agency theory is important concept in order to observe accounting system. But the theory is just one element of present-day accounting system and incomplete theory, too. So Let s consider lot of accusations about the Agency theory.										
Statistical Decision Making	Decision making using statistical techniques and stochastic models will be treated. Problems of decision making under uncertainty are difficult to solve, but they are interesting and important in their real application. First mathematical preliminaries and basic results are given shortly. Then some useful methods in advanced statistics and operations research are introduced and discussed by using practical examples.	The objectives of this class are to increase understanding of the principles of statistical problem solving and to study the statistical methods and probability models required in the decision making process.									
Academic Writing	This course is to provide participants with experience of writing papers in English. As subject matter for the class we will consider and discuss defining characteristics and differences between European and Japanese culture. Participants will also be encouraged to present and write about their own research.	1) To know the rules regarding the style of academic presentations. 2) To develop the ability to present academic manuscripts, and make presentations to generally accepted academic standards.
